

# Schools in Karviná

Kindergarden and Primary School  
and Secondary School

**Term project**  
1st September 2019  
– 30th June 2020

**Address**  
Horova 654  
734 01 Karviná

**Target group**  
Children and adolescents  
with mental disabilities and  
physical disabilities

## Activities

You will learn how to work with an excellent team, learn working with pupils with various mental disabilities and perceive their needs. You can do various activities which you like with our children – for example learn English or take photos (from our lessons or other activities). You can also introduce your country and its culture and prepare some traditional foods. You just can apply your interests in activities with pupils. You will learn what it means to get involved in school activities and school responsibilities. You will talk to pupils, listen to them, assist during conflicts among pupils, and help them to develop their social skills. You will supervise the safety of children and their behaviour, help pupils to do their homework and assignments, accompany pupils to physiotherapy sessions, prepare and participate in events organized by the school (Christmas meeting, New Year's concert, Mother's Day, etc.).

## Challenges

The school in Karviná does not have English speaking personnel. You will have to have a high motivation to learn Czech in order to integrate or be willing to use alternative communication on daily basis. You will accompany our children during the day including feeding them or go with pupils in bathroom. Therefore, you will face your limits and cross the borders and possibilities. You will have space enough to plan and realize your own mini project.

## Your profile

Surely you need to be able work independently and also in the team. We expect from you, as a volunteer, that you are proactive, open with willingness to help others and to learn new things (for example the Czech language). You also need to be responsible, tolerant and empathic to understand human needs.
