

# KLUB ON LINE - NZDM STREETWORK ON LINE

Low threshold facility  
and street work

## Term project

1st September 2019  
– 31st August 2020

## Address

V Aleji 435  
734 01 Karviná

## Target group

Excluded youth and kids, Roma youth and kids, unemployed young people, youth with personal problems and young people who are drug users.

## Activities

The activities will be divided between the KLUB ON LINE and STREETWORK. You will participate in prevention programmes for children and youth, leisure activities (play games, drawing, tutoring and also practising reading and writing), events and trips with users, interviews with them – it would be great to start learning the Czech language as soon as possible. You will also participate in user consultancy (with the user's consent). For work with our target group, you will have a knowledge of field work with youth on the streets of Karviná – the environments of excluded young people, Roma culture and drug issues, socially excluded localities, socio-pathological phenomena. You will improve your skills in the area of methods of conducting interviews not only for work with youth, special social games of prevention character, etc. Sometimes you can help with administration, creating promotional materials and more.

## Challenges

You will work in the field program for children and youth and in the low-threshold youth club. During the winter months there are fewer children in the field programme. However, in both services, your own activity is important, your initiative to engage in activities or to be inventive – as the English language level of users is not always sufficient (but the workers will help with interpretation). The supervisor and some of the team members can speak English without any problem, the rest of them can manage the basics of English and use a translator or similar support Apps.

## Your profile

We will appreciate the working experience with and knowledge of programmes for editing photos or videos, which we use for preparing events or skills in any sport, the arts sector etc. You should be ready for active contact with young people, especially in the afternoon (ready for everyday for something a little different). It is very important to have the ability to accept others, and to show respect, interest and sincerity not only for working relationship and you should have a willingness to learn the Czech language.
